

T0118 4-20mA

Model: T0118

OMET T0118 is a precision temperature sensor designed for HVAC applications. It features a high-precision PT100 sensor and a 4-20mA output signal. The unit is compact and easy to install, making it ideal for monitoring and controlling indoor climate.

OMET T0118 is a precision temperature sensor designed for HVAC applications. It features a high-precision PT100 sensor and a 4-20mA output signal. The unit is compact and easy to install, making it ideal for monitoring and controlling indoor climate.

OMET

Accuracy	±0.5°C
Resolution	0.1°C
Operating Temperature Range	-10 to +50°C
Output Signal	4-20mA
Power Supply	9-30Vdc
IP Rating	IP20
Dimensions (W x H x D)	88 x 106 x 33 mm
Material	ABS
Weight	150g
Lead Time	3 weeks
