

Datalogger for external CO2 probe up to 50.000 ppm with built-in atmospheric pressure sensor

□□: U2422

Battery powered datalogger with internal atmospheric pressure sensor and for external CO_2 probe up to $10\ 000ppm$ or $50\ 000ppm$. In case of exceeded set limits alarms are indicated by LED, LCD and acoustically by built-in beeper.

The recording is performed in a non-volatile electronic memory. The data can be transferred to a PC via USB-C.

Recorder includes Traceable calibration certificate with declared metrological traceability of etalons is based on requirements of EN ISO/IEC 17025 standard.
